AI-focused Quality Assurance Engineer turned Project Manager with 3+ years of experience delivering AI-powered intelligence platforms, GPS-integrated logistics systems, enterprise shipment monitoring solutions, and mobile applications. Experienced in automation framework architecture (Cypress, Playwright), AI output validation, hardware–software integration (GPS & E-Seal), and cross-border collaboration (Russia & Indonesia). Proven track record delivering 95–98% bug-free releases, increasing test coverage by 60%, reducing defect detection time by 50%, and improving QA efficiency by up to 80% through structured automation and strategic validation frameworks. Currently leading multi-client enterprise projects as Project Manager at Transtrack.

EXPERIENCE : QUALITY ASSURANCE

Freelancer Quality Assurance Engineer 05/2024 - Now

NerdHeadz - Remote - Russia

- Spearheaded QA initiatives across multiple high-impact AI and infrastructure products including ClearJet (Delivery Infrastructure), Uplinked (AI Social Media Assistant), Fixzanet/Fizza Net (AI-powered Job Marketplace), Cytrus.Ai (Commercial Platform), Busybee (Education App), FutureSpark (AI-powered Student Learning Platform), Nexus (AI Investor Intelligence Platform), and Codebeu (AI Mobile Community App).
- Led AI-focused QA strategy including adaptive learning validation, AI-generated report data integrity verification, predictive logic validation, thesis-alignment modeling checks, and recommendation system accuracy testing.
- Designed structured validation frameworks for AI outputs, anomaly detection, and dataset consistency across continuously refreshed intelligence systems.
- Built a Playwright-based UI performance testing framework combining UI and API metrics with auto-reporting dashboards.
- Increased overall test coverage by 60% through scalable Cypress UI & API automation architecture.
- Conducted advanced performance testing uncovering critical UI load bottlenecks undetectable through API testing alone.
- Produced highly detailed and actionable bug reports, reducing developer debugging time by up to 90%.
- Collaborated in a fully international remote team environment, consistently delivering high-quality results despite cross-language communication challenges.
- Collaborated in a fully international remote team environment, consistently delivering high-quality results despite cross-language communication challenges.

Quality Assurance Engineer -> Project Manager 10/2023 - Now

PT. Trans Teknologi Indonesia - Bandung, Indonesia

Promoted to Project Manager in 2025 based on innovation initiatives, leadership, and ability to resolve complex technical and management challenges.

As Project Manager (2025 – Present)

- Managing cross-functional teams (Developers, QA, BA).
- Restructured previously unorganized workflows into structured project delivery processes.
- Resolved technical and operational bottlenecks across ongoing projects.
- Successfully renegotiated multiple project alignments with clients.
- Rebuilt stakeholder trust and received direct client appreciation for system stabilization and structured communication.
- Implemented time-tracking tools for structured performance reporting.
- Designed internal reporting dashboards (Notion-based) improving management visibility.
- LSI Telematik (Client: Apical – APRIL Group) – Enterprise shipment monitoring system integrating GPS tracking, weighbridge, and fleet monitoring.
- Halal Logistic Tracking System (Client: JAKIM – Malaysia) – Web-based halal compliance ecosystem integrating GPS, E-Seal smart locks, and vendor certification tracking.
- MyTask (Internal Management System) – Productivity and workflow management application.

As Quality Assurance Engineer (2023 – 2025):

- Researched and implemented self-hosted test case management alternative to reduce high subscription costs (saving significant monthly operational expenses).
- Built automation frameworks reducing regression effort and improving release stability.
- Continuously evaluated tools that improved workflow efficiency and reduced company expenses.
- Delivered GPS-based logistics tracking system with 98% bug-free production release.
- Improved GPS and hardware tracking precision by 75% across fleet and personnel.
- Increased QA productivity by 80% through structured documentation and environment standardization.
- Participated in early-stage feature feasibility validation, reducing conceptual defects.
- Mentored junior QA members and improved process maturity.

Freelance Mobile Quality Assurance 06/2024 to 08/2024

Pradini - Remote - Indonesia

- Achieved **95% bug-free mobile application releases** for a healthcare app supporting premature baby care.
- Verified cross-platform functionality on **iOS and Android**, ensuring consistent performance.
- Conducted **regression testing**, ensuring no feature degradation across releases.
- Integrated medical insights into the app, increasing user trust and adoption by **45%**.

EDUCATION

S1: Computer Science 2019 - 2023

Universitas Islam Negeri Sumatera Utara Medan, Sumatera Utara

- IYSA Silver Medal (International Young Scientist Association) 2021
- Outstanding Student "Wahdatul 'Ulum Uinsu Talent 2021"
- 3rd Best Speaker PKM 2 English Debate 2021
- Entrepreneur Academy Camp KSE (Tangerang - Bogor) 2022
- KSE Student Summit Leadership Camp (Semarang) 2022
- Member of the Haxor Programming Club
- Awarded Karya Salemba Empat Scholarship 2020 – 2023

SMA: Exchange Student 2017 - 2018

Keya Paha County Higschool Nebraska, USA

- Future Farmer American (FFA) Club Member
- International Education Volunteer
- Awarded Bina Antar Budaya, Youth Exchange Student, USA
- 3rd Winner of FFA Competition Regional Nebraska

Bootcamp/Intern

Bootcamp: Quality Assurance 2023

DTS Kominfo: Binar Academy Online

- Understand fundamental of Quality Assurance and step to create test case & test scenario
- Able to understand about testing principles, Agile & Deployment phase and create bug reporting
- Able to understand about fundamental of API testing and present deliverable as Manual Quality Assurance such as Test Case Form and Bug Reporting
- Bootcamp Overall Score 91.5 (Scale 0 - 100).

Internship : Quality Assurance 06/2023 to 08/2023

PT. Sagara Teknologi - Remote

- Held responsibilities as Manual QA for Techno Consulta Website Project and Jobfortech Website.
- Developed over 1000 scenarios showcasing creativity in test case creation.
- Identified over 50 bugs across various priority and severity levels, optimizing the application system by 90%.
- Produced organized and comprehensible test documentation.

Internship : Quality Assurance 05/2023 to 08/2023

PT. Didayah Olah Teknologi Indonesia (DOT) - Remote

- QA Project: ASTRA PAMA CAPEX
- Developed testing scenarios and test cases for Astra PAMA CAPEX website
- Explored testing workflow approval processes.
- Identified and reported approximately 30 bugs, contributing to their resolution.
- Utilized the Waterfall framework.
- Provided suggestions for web improvement
- Employed the QASE application for bug reporting and test scenario creation

Project-Based Virtual Intern : Quality Assurance Jubelio x Rakamin Academy 04/2023 to 05/2023

Jubelio – Rakamin Academy - Online

- Developed and executed test cases for various features in Jubelio, including user login, negative testing for login, and creating non-variant products in the catalog
- Conducted API testing using Postman on various endpoints, such as login, all product price, upload product image, and delete product, while also including negative testing scenarios
- Created automation scenarios using Selenium Web Driver for various features in Jubelio, including login flow and inventory stock management

Project-Based Virtual Intern : Quality Assurance Evermos x Rakamin Academy 04/2023 to 05/2023

Evermost – Rakamin Academy – Online

- Created integration test scenarios for 2 APIs and implemented them in k6, including assertions for each test in 1 test file.
- Developed performance test scenarios for 2 APIs with 1000 virtual users, 3500 iterations, and a maximum response time tolerance of 2 seconds, and added assertions for each test in 1 test file

ORGANIZATION

- Chairman of Karya Salemba Empat UINSU Scholarship Organization 2022 – 2023
- Chairman of Community Development KSE UINSU 2021 - 2022
- Treasurer Entrepreneurship Division KSE UINSU 2021 - 2022
- Public Relations HMJ Computer Science (Student Association Major) 2020 – 2021
- Haxor Programming Club Member 2019 – 2022

CERTIFICATE

- Batch 1 Course Quality Assurance March 6, 2023 - April 14, 2023
- Full Stack Developer with Ruby (HTML, CSS, Ruby and Ruby on rails) Fresh Graduate Academy 07 Mar 2022 - 08 Apr 2022
- Cloud Practitioner Essentials (Belajar Dasar AWS Cloud) Dcoding, 24 Apr 2023
- Teknik Menemukan Ide Produk Digital Untuk Manager Pengembang Aplikasi TIK (Product Manager) Skill Academy, 23 Nov 2022

SKILL

Soft skill:

- Attention to Detail
- Analytical Skills
- Communication
- Problem Solving
- Continuous Learning
- Time Management

Hard skill:

- Test case development and execution
- Automated testing tools (e.g., Selenium, Appium, Playwright, Postman, Cypress, BugBug.Io)
- Performance testing tools
- Test management tools (Gitlab, Qase)
- Quality management methodologies and frameworks (Agile, Waterfall)

- Test-driven development (TDD) and behavior-driven development (BDD)
- API testing

Languages
- English: Conversational
- Bahasa Indonesia: Native
